Embracing Open Source in an Automotive Safety Context

DISCLAIMER

Some views presented in this presentation are my personal views and do not necessarily represent the views of my employer.

THREE WORLDS MERGE

Classic Autotive

High Performance Computers

Cloud & twins

With great compute powers comes great responsibility for safety and security

V O L V O

CULTURE & MINDSET

CHALLENGES

- **Multiple Tech Domains**
- **Contradictions**
- **FEAR**
- **Tradition**

DISRUPTIVE TIMES

We need foster an open and collaborating mindset and respect diversity and multiple perspectives more than ever during these disruptive times

Or we will risk solving the wrong problems, or even create new ones we did not have.....

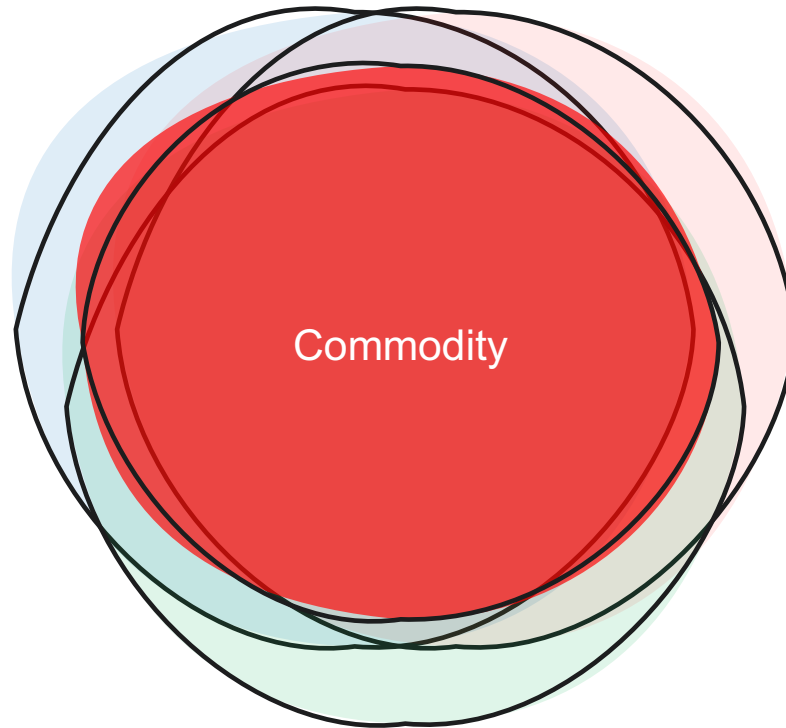

MY LESSONS LEARNED

”Corporate SUCCESS stories often begins with an Open Source Engineer being listened to.”

MY LESSONS LEARNED

”Corporate DISASTER events often begins with an Open Source Engineer being ignored.”

OEMS UNIQUE REQUIREMENTS

V O L V O

CLASSIC REALITY

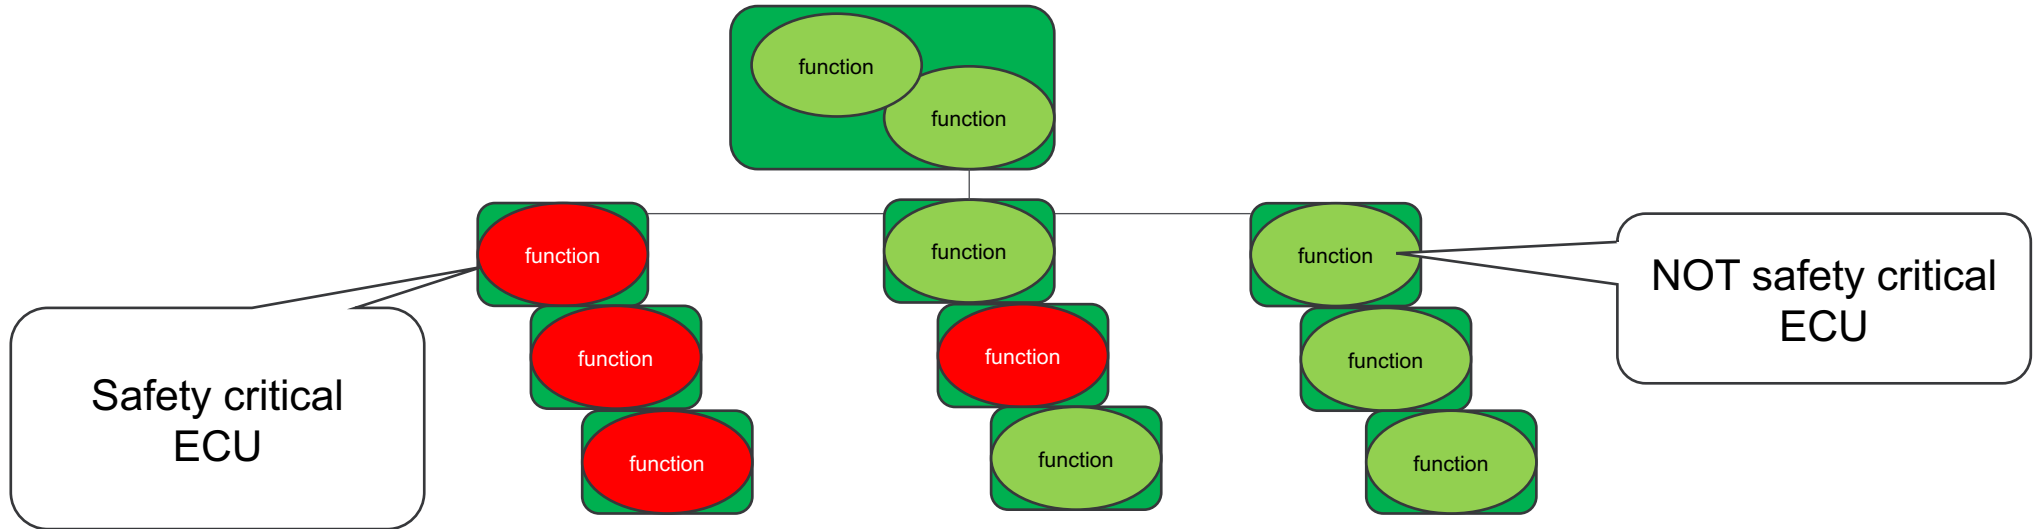

CLASSIC AUTOMOTIVE FUNCTIONS

ANALOGYFunction is a specific Movie, a VCR that **ONLY** plays **ONE** video

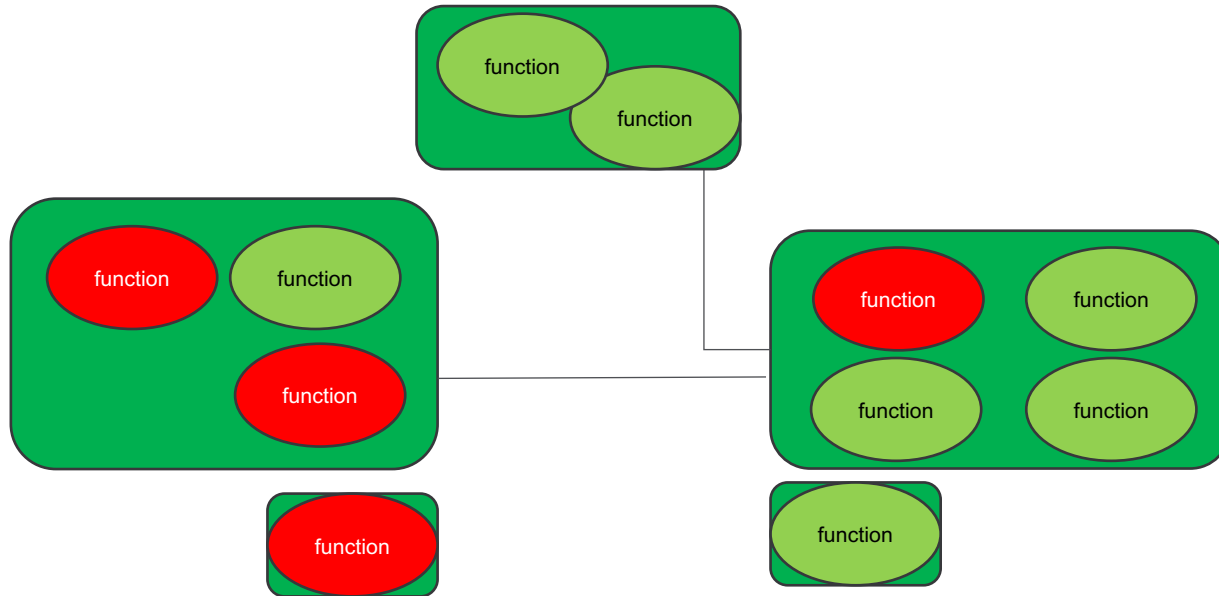

ECU: Electronic Control Unit

CLASSIC AUTOMOTIVE

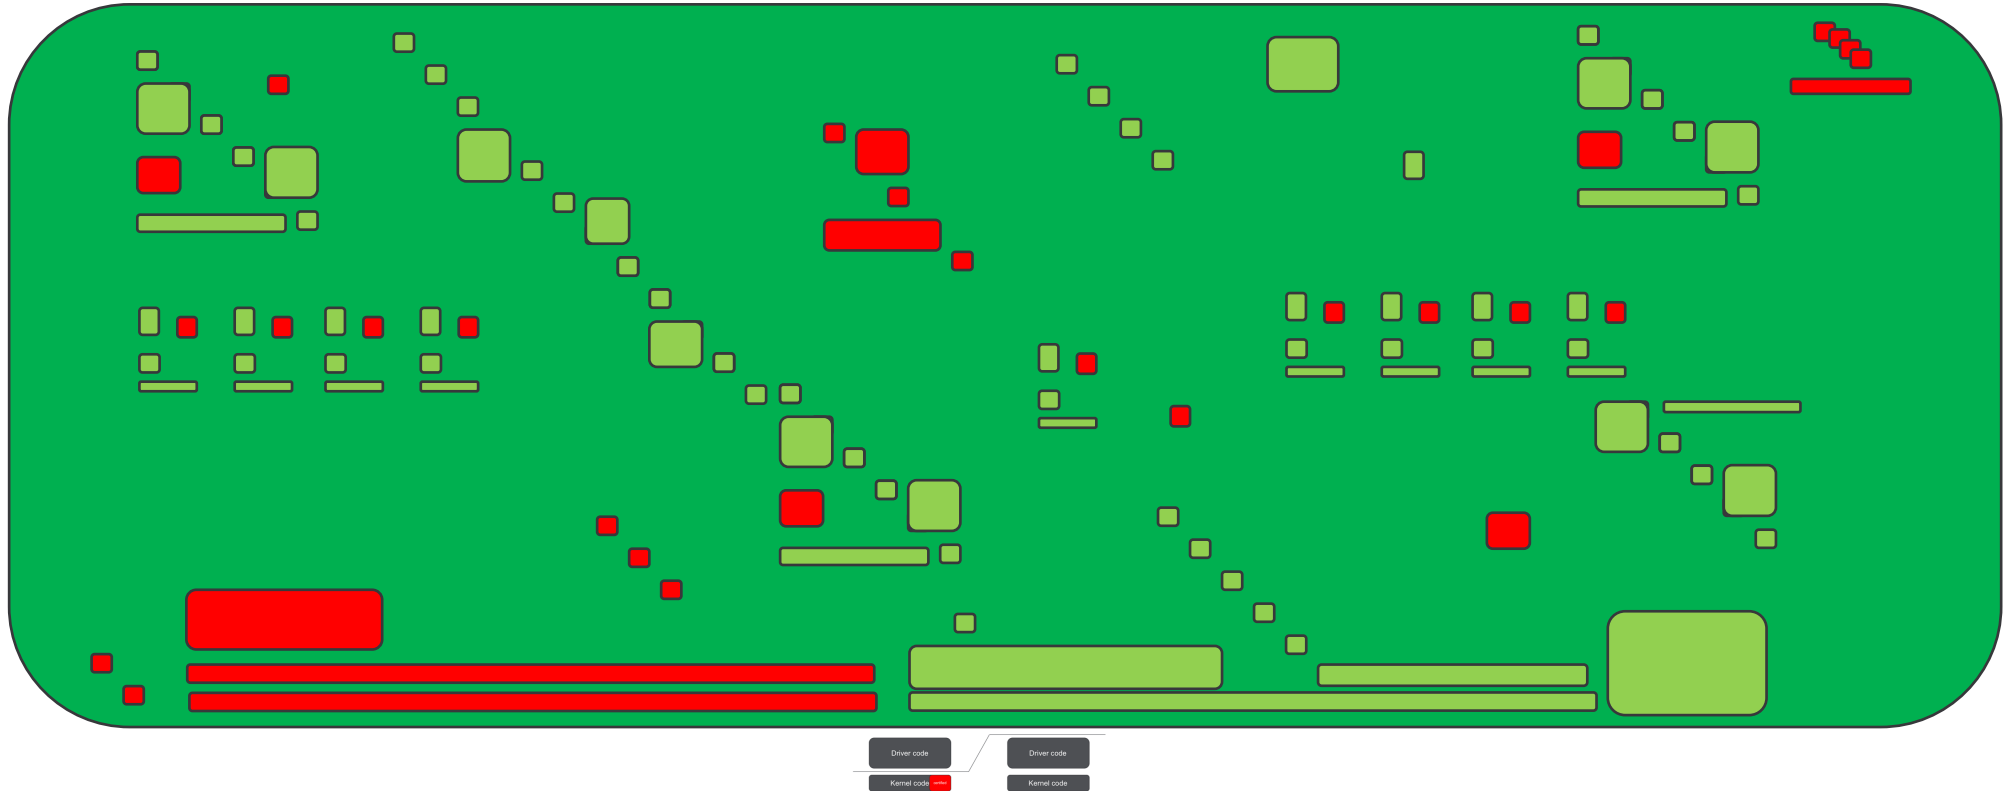

CLASSIC AUTOMOTIVE EVOLVING

PERSPECTIVE: REALITY

SOC

DO NOT FORGET THAT....

“Reality is the actual problem, do not simplify it too much.”

*Mike Acton have a really good presentation explaining how one need to address DATA
* Quote from Mike Acton in: <https://www.youtube.com/watch?v=rX0ItVEVjHc> , CPPcon2014*

V O L V O

THE STORY ABOUT THE MYTHICAL TOP DOWN AND BOTTOM UP HORSEPOWER

BOTTOM UP IS WHEN YOU KNOW HOW IT WORKS ...

?

V O L V O

.... BUT YOU DO NOT KNOW WHAT YOU WANT

TOP DOWN IS WHEN YOU KNOW WHAT YOU WANT ...

?

V O L V O

... BUT YOU DO NOT KNOW HOW IT WORKS

**SOMETIMES BOTTOM UP AND TOP DOWN IS COMBINED:
YOU DO NOT KNOW WHAT YOU WANT AND YOU DO NOT KNOW HOW IT WORKS**

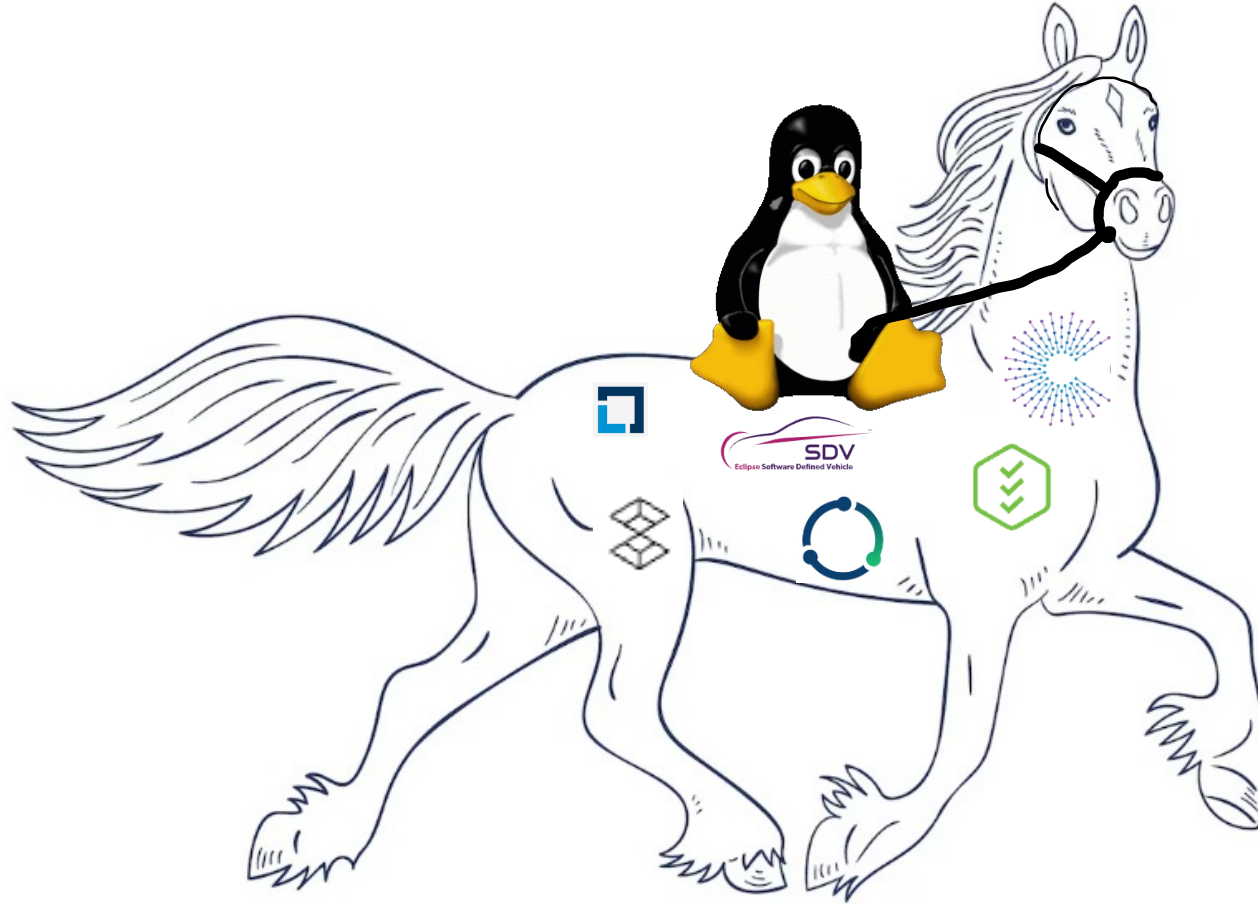

V O L V O

**WE NEED TO MOVE TO A WANTED STATE: THE ULTIMATE HORSEPOWER
YOU KNOW WHAT YOU WANT AND YOU KNOW HOW IT WORKS**

OPEN SOURCE FOUNDATIONS CAN CREATE A SAFE ARENA BETWEEN COMPANIES AND COMMUNITIES

COLLABORATION SAFE HOUSE

”OSS Foundations can provide a safe space for companies to collaborate on shared standards and building blocks, overcoming conservative culture and risk aversion that might otherwise inhibit collaboration.”

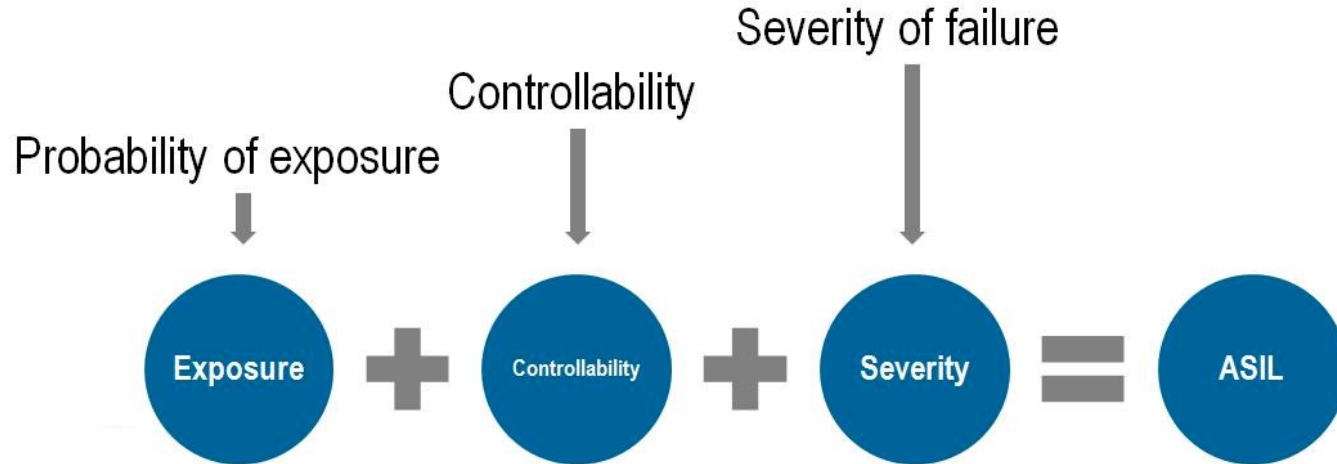

Open source SW in Automotive industry – Vision paper from Eclipse SDV and EU

SAFETY

Disclaimer: I Am Not A Safety Engineer....IANASE

SYSTEM SAFETY IN AUTOMOTIVE (ISO 26262 AND MORE)

ISO26262 is NOT a prescriptive Standard...

Know what you are doing!

V O L V O

CHALLENGE : SAFETY ELEMENT OUT OF CONTEXT (SEOOC) BEST PRACTICES

Assumed context

Your context

“Safety Element is a HW, SW or System Element that is Safety relevant. When we say “Safety relevant”, it means that it is in some way contributing to achieving or violating the Safety goal.”

<https://www.functionalsafetyfirst.com/2020/10/what-is-safety-element.html>

Bottom Up

<https://www.functionalsafetyfirst.com/2020/10/seoc-for-dummies.html>

SAFETY ELEMENT OUT OF CONTEXT (SEOOC)

**Just because it is tested OUT OF YOUR context
does not necessarily make it safe IN YOUR context.**

THIS IS NOT THE.

SYSTEM SAFETY MANUAL

WE ARE LOOKING FOR.....

THE SYSTEM SAFETY MANUAL

- States the Safety Goal and intended functionality
- Describes Howto integrate a SEooC correctly in a safe way.
- Check if assumptions in the Safety manual match your system's requirements.

Best practices:

- **Assign qualified Safety professionals**
- **Treat Assumptions as requirements**
- **Deeply understand each assumption**
- **Read all supporting tech docs**
- **Start Early**

<https://www.functionalsafetyfirst.com/2020/11/what-is-safety-manual.html>

SEIOC INTEGRATION CHALLENGE ANALOGY

- Medicine

SEIOC INTEGRATION CHALLENGE ANALOGY

- Medicine

“Reality is the actual problem, do not simplify it too much.”

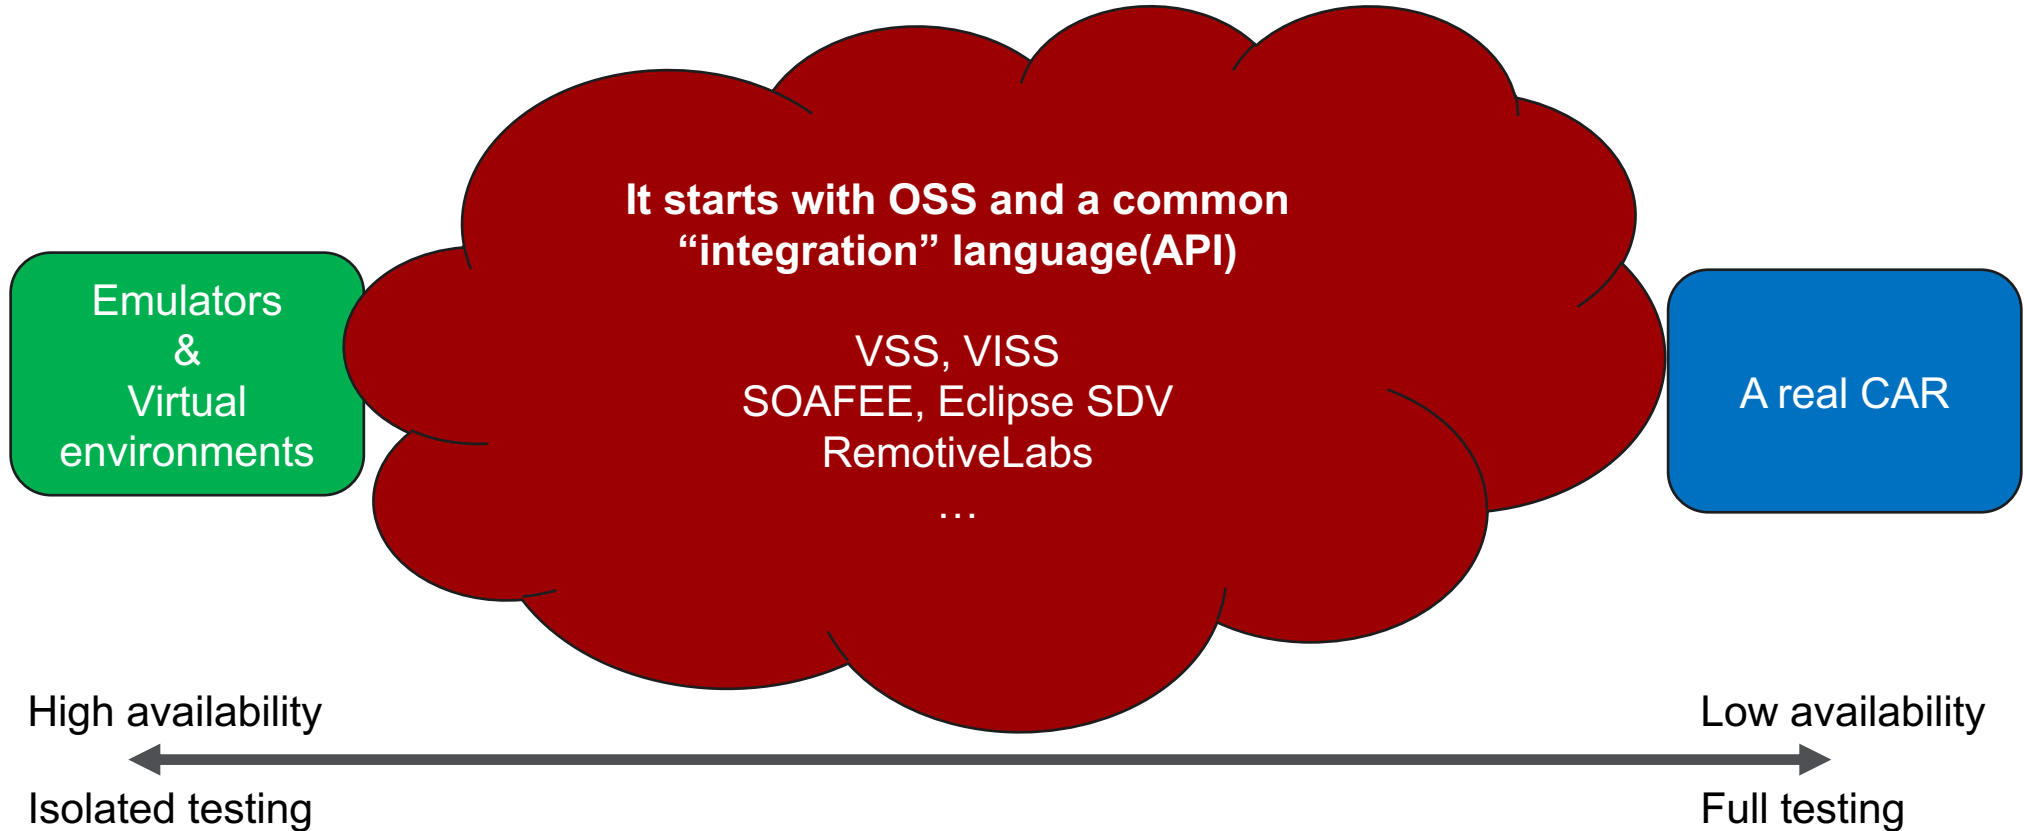

...

Integration is a huge challenge

FIND PROOF OF SAFETY

PROOF OF SAFETY

THE SDV SAFETY CHALLENGE

It is a great effort to
achieve a certification
once, maintaining it is
magnitudes harder

SO...

How can we make sure
everyone is safe in traffic?

SO...

How can we make sure everyone is safe in traffic?

In 1959, Nils Bohlin at Volvo Cars invented the V-type three-point safety belt and it proved to be a real lifesaver and Volvo Cars took the brave decision to “Open Source” the patent to **ensure that everyone could be safer in traffic.**

V O L V O

THE DIGITAL SAFETY BELT

THE DIGITAL SAFETY BELT

A COLLABORATIVE culture and an OPEN SOURCE MINDSET will be the new DIGITAL SAFETY BELT assuring the highest level of SW quality. More Openness and collaboration in order to solve the huge complexity we put ourselves into and try to keep it as simple as possible. Keep assumed context and real context closer.

MY TAKE ON THE DIGITAL SAFETY BELT

We do not find any pleasure in others being worse when it comes to public safety.

We all share the same roads

THE DIGITAL SAFETY BELT

Stay Safe
