# Cloud & Connected Services — Status Share

Opportunities

- The framework is being mapped to popular cloud platforms to check options and feasibility. This will broaden the portability of CCS framework and minimize the prevention of PaaS vendor lock-in.

  - First mappings have already begun targeting AWS, Azure, Google Cloud and IBM Cloud

  - AWS mapping: CCS-101

  - IBM mapping: CCS-189

- Implementation steps in one or several of the evaluated platforms to be done next
