CVII February 18 Joint Working Session

Welcome to a comprehensive shared information and discussion session led by **W3C** and **GENI VI**
for all companies interested in the **Common Vehicle Interface Initiative**

Open invitation - please find Webex details on the parent page.

NOTE: This session did not have a long introduction the CVI initiative which has now been active for quite a while. Instead it went directly into the work assuming that participants were aware of the initiative background and goals.
Feel free to contact Ted Guild or Gunnar Andersson for more introduction.   There is also plenty of material from previous presentations on the parent page.

Agenda

NOTE: Details and times are subject to change.

SECTION	Starting Time	Topic	Slide deck
Welcome and Introduction	1600 **CET** (10:00 AM **EST**)	Welcome everyone.	
	1605	Working session plan and agenda **Ted, Gunnar**	PDF
Section 1: **CVII Related projects Updates**	1615 (approximate time)		
"	1615	**VSS** – VSS 2 release and latest features **Sebastian Schildt, Bosch**	PDF
"	1620	**VSSo** **Daniel Wilms, BMW**	PDF
"	1625	**VISS v2** – approaching milestone release **Ulf Bjorkengren, Geotab**	PDF
"	1630	**VSC/RPC** **Ted Guild, W3C**	(see main presentation later)
"	1635	**CCS** **Iyyaz Baber, Cobrasphere**	PDF
"	1640	**AASIG-VHAL** **Stefan Wysocki, TietoEVRY**	PDF
"	1645	CVII **Technology Stack** General Meeting **Gunnar A, GENIVI**	PDF
Spare time for Frequently asked questions / project info. Discuss participation expectations	16.50		
Section 2: **Model development and Alignment**	1655 **CET** (10:55 AM **EST**) (approximate time)	----------------	
	1655	**Agenda / Section Introduction**	
"	1700	Alignment opportunities for **SENSORIS data model and definitions** **Stefan Werder (Bosch)**	PDF
	1715	Alignment of the **eSync** Data Pipeline with the Common Vehicle Interface Initiative **Mike Gardner, eSync Alliance**	PDF

"	1725	The **VSS Layers Concept** (MOVED: was presented near the end of the session instead) **Gunnar A GENIVI**	PDF
"	**1735**	Alignment opportunities for **Open Insurance** data model **Fouad Husseini, OPIN**	pptx
spare time	1750	Spare time	
BREAK	1755	**BREAK ~10 min**	
reassemble	1805	Reassemble after break	
Section 3: **The Technology Stack**	1810 **CET** (12.10 PM **EST**) (approximate time)	----------------	
"	1810	A common model for automotive interfaces: The **Vehicle Service Catalog,** associated protocols and technologies. **Magnus Feuer**	PDF
	1840	Building blocks of a data centric architecture **Daniel Wilms, BMW**	PDF
"	1905	Bosch VAPP update and plans "Live demo" included (IDE integration) **Dirk Bangel & Lars-Erich Kiefer, Bosch**	PDF
"	1940	Spare/discussion time. Any remaining topics (optional, time permitting) More Tech Stack details, WebOfThings, In-Vehicle connections, Cloud PaaS, ... **Ted/Gunnar/All**	N/A
		Wrap up	
END	2000 **CET** (2:00 PM **EST**)	----------------
