

CVII Extended Working Session Agenda

On **1 July starting at 1600 CEST**, GENIVI, W3C and interested contributors will gather for our next, extended working session on Common Vehicle Interface Initiative (CVII) topics. As you can see in the agenda below, the topics will include a broad range of existing and new topics. We want to thank those who completed the pre-workshop survey and the working session will kick-off with the important findings of that survey.

The Agenda for the working session is as follows:

- **Welcome and Agenda Review**
- **CVII Survey questions and results**
 - Tailoring CVII priorities to industry needs
- **Vehicle Service Catalog, and the potential of an industry-common Service Interface Description Language:**
 - Including a proposal for VSC language, Franca IDL, OpenAPI, AsyncAPI and other options
- **Alignment: ISO Extended Vehicle specification – status and future discussion**
 - Learn what the ISO ExVe specification contains and does not, outlook for the future and a discussion of data standardization

B R E A K (at approximately 17.30)

- **Connecting to and with AUTOSAR**
 - Discuss opportunities and plans for connecting data and service models used in-vehicle and outside
- **AOS – A new cloud-and-vehicle framework**
 - Another example of CVII-compatible full-stack development with potential for collaboration
- **Building the full “CVII technology stack”**
 - Plans and open discussion

Webex details can be found on the [CVII Wiki page](#). If you have questions, please contact [Philippe Robin](#), [Gunnar Andersson](#) or [Ted Guild](#).
