

2023 Autumn AMM (Data Architecture and Infrastructure)

Planning for the Data Architecture and Infrastructure sessions/workshops at the 2023 Autumn AMM in Troy, Detroit, MI

- Possibilities from meeting brain storming
 - [Christian Muehlbauer](#) discussing internally about what we might be able to show. Workshop could discuss knowledge layer proposal.
 - [Arnaldo Vera](#) Some possibilities we are discussing: Tooling for conversion to JSON-schema. Realm for OTA. Connected car sync.
 - Steve mentions [Adnan Bekan PR](#) for a VSS vspec to json-schema tool. Arnaldo will take a look.
 - [Stephen Lawrence](#) Store/Server playground, Design doc publishing.
 - [Ulf Bjorkengren](#) plans to present update on HIM including new additions.
- [Paul Boyes](#) interesting to see conceptual design/requirements for connecting signals to non-signal info/knowledge in-vehicle and on to cloud.
 - Discussion of how this relates to other areas. Some topics likely best as a wider group workshop, e.g. combining data models
