VISS Migration to COVESA Plan Items

Migrate Spec

- Core
- Transport
- Currently using respec.
    - What should we use in COVESA?
    - Continue to use respec?
        - Keep respec
- Licensing/Copyright
    - Attribution
    - W3C to archive
    - https://www.w3.org/copyright/software-license-2023/
    - Can the license be changed?
    - W3C
- What is our plan for working with VISS spec moving forward?
    - Is it similar to VSS/
        - Or more formal?
- Will VISSv2 be brought to recommendation in W3C.

Migrate Reference Implementation

- https://github.com/w3c/automotive-viss2
- Code license MIT.

Communication

- Ted to communicate with W3C our intent
    - Spec license/copyright
- Announce before AMM
- VISS session at AMM to announce, answer questions and recruit

Way of working

- Setup Page
- Project Charter
- COVESA code contribution guidelines
